Work Experience

Podean (2025)

Website Hubspot Developer

I'm the one managing their Hubspot account but my focus is on developing websites and funnels for the marketing and growth of the company. I'm also doing UI/UX design for the increase of CRO.

Eclipse Digital (2023-2025)

Website Project Manager

The company allows me to recruit my own group of website developer so I need to be responsible in handling the projects thoroughly. I make sure that the website project will be finished on time and any issues that will come up should be communicated clearly to the client and at the same time I need to offer some solutions for it. So I'm the one communicating to the client and at the same time to the developers.

Houzerz Real Estate and Loans (2020-2025)

Website Developer / IT Help Desk

I'm the one who created their website and maintaining it until now and they are having other web project that I'm currently doing. I'm also part of the marketing team who do the marketing strategies, SEO and digital marketing.

Digital One Systems (2023)

Website Developer / SEO Strategist

I rebuild their website with the goal to make more sales by which we already achieved. I also help them to connect their site to a dropshipping company.

The CEO Creative (2021)

Website Developer

This is an e-commerce site where I help in making sure the website is working everyday and making sales since this site is already generating a large amount of money.

Converging Solutions Pty. Ltd. Australia (2016-2020)

Senior Developer

As the Senior Developer, I have the responsibility to handle big projects and resolve big issues in clients website. I usually do modifications of Wordpress themes and creating plugins. We are also planning to do subscription-based programs that we will market in the future.

PLM Group (2016)

Website Designer and Developer

I build website from scratch. From creating mockup, designing layout, graphic designing up to the building of the live site. The site should be mobile responsive.

Jezweb (2016)

Website Developer

I've been assigned here to build a website from scratch. The designer gave me a psd file then I convert it to a live site. The site should be mobile responsive.

Work Experience

Alrowad Trading Co. (2015-2016)

Website Manager

I rebuild their site to fix some bugs and I manage it to become functional. The owner give me the tasks to input hundreds of products to their site. I found a way to input the product with the use of .CSV files.

Boxfield Packaging Products (2011 – 2015)

Computer Programmer & Technician, Network Administrator

This is where I work as the only IT staff. I do all the maintainance of computers, server and all networked computers. I've made many computer programs like inventory, payroll, and sales program for the use solely of the company.

Corasia Paper Products Company (2010-2011)

Computer Programmer

A new established company that time where I do a payroll program to simplified the work of the human resource staff. The staff will simply input the time-out and time-in of all the employees and it will automatically do all of the computations including the overtime and late amount of the employee.

Megaton Paper and Packaging Products (2009-2010)

Computer Programmer

I've been assigned to assist in maintaining the company's program which is the Sales System.
It is significant to the operation of the company to continue its production of carton boxes and give clear information to the production manager and sales representative.

Cooperative Development Office (2008)

Programmer, Computer Secretary(O.J.T.)

The company gives me the chance to apply what I learn. I do some database program for the purpose of organizing company's data.
